

**ABSTRACT****SYSTEM AND METHOD FOR PAYMENT RECEIPT USING 2D CODE**

5           A payment receipt system is provided. The payment receipt system  
comprises: a receipt management database for managing at least information on the  
payers who have to pay and the payment amount that the respective payers have to pay  
for a certain period; and a payee server including an information extracting part for  
extracting information including the information on the payers and the payment amount  
10 from the receipt management database, a code converting part for converting the  
extracted information into a two-dimensional (2D) code, a bill forming part for making  
out a bill for payment with the converted 2D code attached thereto, a bill transmitting  
part for transmitting the bill for payment to a receiver of the payer, and a controller  
receiving information on the payers who have completed a payment from a financial  
15 institution server.
